Annual Museum Survey 2024

Questions for single-site museums

This document lists the questions from the Annual Museum Survey 2024 for single site museums.

Please do not treat it as a survey submission form – it will not be accepted or processed as such. If you have any accessibility needs and would like to submit your survey responses in a different format, please contact us at museum.data@bristol.gov.uk.

If your organisation operates more than one museum site, please refer to the information for multi-site organisations. The survey operates with survey software, and we ask that responses are provided via the unique URL your museum will have received from us via museum.data@bristol.gov.uk email.

When completing a survey, it is helpful to know in advance what questions are asked within the survey, especially when it may require other colleagues to provide data for some answers.

Please note, the survey online version uses skip logic to avoid asking questions that do not apply, however this document sets out all possible questions. As a result, this list of questions will be longer than completing the survey online. NPO survey questions which align with the Annual Museum Survey 2024 have been shown in red text and included within the online survey.

We have aligned our question regarding the collection of staff and volunteers' information on their protected characteristics to reflect Arts Council England's NPO questionnaire. Our survey now asks about collecting information on "Sex or Gender" rather than "Sex". This is indicated by the "Revised question" icon.

Survey copy:

Once you answer the last survey question, you will be able to save your answers and complete the survey. **After you submit your survey response, you will not be able to go back into the survey to change your answers. On the survey's final page, you will be able to print and/or save your survey submission.** We strongly recommend doing so to have all the information at hand and to check for any inputting errors.

If you spot any error, please contact museum.data@bristol.gov.uk so we can correct your information and issue a copy of your updated survey response. This function is only available to us up to the date of the survey close on 2 July (Tuesday), 5pm.

Annual Museum Survey 2024 - Introduction

The purpose of the Annual Museum Survey is to gather evidence to help demonstrate the social and economic importance of museums to funders and stakeholders – locally, regionally and nationally - and to provide museums with data to enable them to benchmark their performance.

The survey is **open from the 20 May (Monday), midday and will close on the 2 July (Tuesday), 5pm.**

What's in it for museums?

- Advocacy – evidence to make the case for your social and economic value in order to sustain investment
- Performance benchmarking – consistent data to compare your museum's operational context
- Informing strategy – knowing your operational context will support your business planning
- Fundraising – the data can be used as evidence to support funding applications or to express your value with the public

Keeping your data safe and using it to benefit museums

Museum Development South West (Data Processor) is commissioned by Yorkshire Museum Trust on behalf of Museum Development England (Data Controller) - the collective name of the five Museum Development providers - to provide this national survey. Your survey responses will be stored and processed in compliance with the General Data Protection Regulation (2018). You can find further information on how we will use and share your data along with your Museum Development providers' privacy notice on our [Annual Museum Survey information page](#).

By submitting your responses to this survey you consent for your data to be:

- Combined with those of other museums to produce publicly available reports in a variety of forms at a regional and national level (your museum name will not be used in these reports without your consent) available on Museum Development websites.
- Included in an aggregate dataset generated by the survey in 2024 to be shared with Museum Development Providers and Arts Council England
- Used in the anonymised dataset published on Museum Development websites from October 2024 - approximately one year after regional reports are published

Published datasets will not include financial information. No personal information will be published in publicly available reports or datasets or shared with other organisations beyond the Museum Development Providers and Arts Council England.

You can withdraw your consent prior to the publication of reports and datasets, by 2 July 2024 and can request a copy of your data by contacting museum.data@bristol.gov.uk by 31 July 2024.
